If you do not provide Wi-Fi access to guests or your current network cannot meet the ever increasing demands of todays connected tourists then get in touch with FNQ Computers for a free appraisal of your requirements. Our certified engineers can build a cost effective solution that will increase visitor rates and potentially be a fantastic revenue stream.

Case Study: Barron Valley Hotel

The Barron Valley Hotel situated in the Atherton Tablelands installed an FNQ Computers wireless solution to cover both the rooms and common areas of their accommodation that mostly services backpackers that come to the region for its abundance of farm related work. During the last year the usage and revenue has continued to increase.

Ticket Sales by Location: 01 May 2014 - 01 May 2015			
Ticket Plan	Wholesale Plan	Total Sales	Retail Revenue
10GB7days	10GB7onsite	137	\$2,740.00
1dayFree	1dayFree	10308	\$0.00
5GB7days	5GB7onsite	990	\$11,880.00
unlimited7days	unlimited7dayonsite	40	\$2,000.00
Total		11475	\$16,620.00

The plans the hotel offers its guests are:

- 100MB per day free
- 5GB over 7 days—\$12
- 10GB over 7 days—\$22
- Unlimited data over 7 days—\$50

Utilising cost effective state of the art hardware this network cost approximately \$3500 to install including hardware, cabling and installation so return on investment was achieved within months and now provides the hotel a steady revenue stream which runs itself with minimal interaction required with hotel staff.
